#### INTRODUCTION

This menu resource was developed by Dietary Solutions for the North Dakota Department of Health and Human Services, Adult and Aging Services Section under guidelines established by the Older Americans Act (OAA) Nutrition Programs. These menus are designed to be utilized by congregate and home-delivered nutrition program providers to support the goal of reducing hunger and food insecurity, promoting socialization, promoting health and well-being, and delaying adverse health conditions.

Meals approved for this menu provide at least one-third of the recommended Dietary Reference Intakes established by the Food and Nutrition Board of the Institute of Medicine of the National Academy of Sciences and adhere to the 2020-2025 Dietary Guidelines for Americans, issued by the Secretaries of the Departments of Health and Human Services and Agriculture. Adhering to these criteria ensures the meals provided promote good health and meet nutritional needs of the older adults served. Meals are planned to offer a greater variety of vegetables and fruit, whole grains, lean meats/meat alternatives, and low-fat and fat-free dairy while minimizing added sugar and saturated fat. These menus have been created and approved by registered dietitians. Computer-based nutrient analysis has been used to ensure these menus meet nutrient requirements.

These menus are designed to honor preferences of the participants based on feedback solicited from both home-based and congregate meal recipients. Menus are intended to meet ethnic, cultural and food preferences of participants with a focus on the younger 60 plus American while allowing choice in meals served.

Providing healthy meals that are enjoyed and well accepted by the population served are key components of safe and productive living for the Older Americans we serve.

We welcome any feedback including questions, concerns or additional menu and recipe related needs. Contact NDsupport@dietarysolutions.net if we can assist in any way.

#### **MENU OVERVIEW**

These menus are based on the 2020-2025 Dietary Guidelines for Americans and Older Americans Act nutrition requirements. Each meal is designed to provide the required 1/3 of the Dietary Reference Intakes (DRIs). This guide details best practices for food purchasing and preparation to ensure the guidelines are met.

#### PRINTING RECOMMENDATIONS

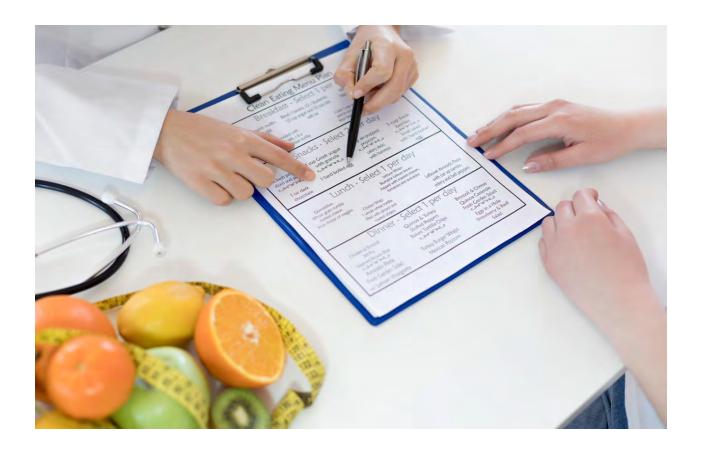

This menu document has been put together in a way that eliminates the need for reprinting standard guidelines and resources.

It is recommended that the introduction, menu overview, and menu packet are printed with each menu. This will provide the week at a glance menu, recipes, and nutritional analysis for the menu to be used by staff preparing and serving the menus.

The alternative menu and appendices should be printed at least once and our recommendation is these are kept in one menu manual for staff use at each location. These items will not change with each new menu distributed. This will eliminate the need to print these sections with each new menu.

#### **MENU PACKET**

The Menu Packet contains menus, recipes, and nutrient analysis for the menu. Each meal is planned to meet 1/3 of the DRI's and follow guidelines set by the 2020-2025 Dietary Guidelines for Americans.

The menus and recipes should be printed and used by staff preparing and serving the meals.

#### **ALTERNATE MEALS**

Alternate meals have been provided for both Fall Winter and Spring Summer menus. These meals are intended to be used to swap out an entire meal from the planned 4-week menu. This may be desired based on participant preference, product availability, operational preference, or to increase menu customer choice.

Each of the alternate meals has been planned to meet the nutritional requirements for the older adults served under the Older Americans Act. Recipes have been provided for the alternate meals.

### **CARBOHYDRATE CONTENT**

An outline of the typical carbohydrate content of meals has been provided as a resource to answer potential participant questions related to the amount of carbohydrate in the meals served. The amount of carbohydrates per serving is based on the typical meal patterns used for menu planning. Participants who are diabetic may ask for this information. The charts provided include food components, serving sizes, and grams of carbohydrate per serving.

#### **MILK ALTERNATIVES**

Milk or milk alternatives are required to meet nutritional needs of older adults as outlined in the Dietary Guidelines for Americans 2020-2025 and to meet Dietary Reference Intakes (DRIs). This reference is provided to clarify food items and serving sizes that meet the dairy requirement.

#### **MILK ALTERNATIVES**

The daily dairy recommendation for Older Americans is 3 cups of Dairy (or equivalent). Below is a list of 1 cup dairy equivalents. Reduced fat or low-fat choices are recommended.

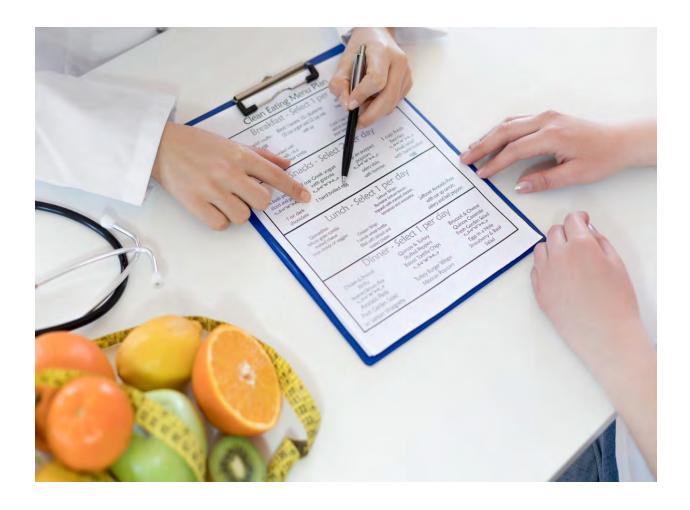

Fortified soy milk and yogurt with added calcium, vitamin A, and vitamin D are a part of the Dairy Group. This is because their nutritional content is like dairy milk and yogurt.

Other products sold as "milks" but made from plants like almond, rice, coconut, oat, and hemp "milks" may have calcium. But they are not a part of the Dairy Group because their nutrition content is not like dairy milk and fortified soy milk

Substitution lists are intended to be used in the case where menu adjustments are needed for specific items based on short term product outages or production changes.

Substitution lists are intended to be used in the case where menu adjustments are needed for specific items based on short term product outages or production changes.

To ensure substitutions are appropriate and meet the nutritional needs of participants served please follow these general guidelines:

- Milk should be low-fat (1%) or fat-free, unflavored is recommended.
- Vegetable servings include fresh, frozen, canned, rehydrated, or pasteurized 100 percent full-strength vegetable juice.
- The sodium content of vegetables can be reduced by serving fresh, frozen or no added salt products.
- A serving of cooked vegetables must be drained.
- Serving a variety of colors of vegetables throughout the week increases the nutritional value of meals served.
- Fruit Juice must be 100% juice to count as a fruit serving.
- Canned fruit is recommended purchased in extra light syrup. Light syrup, water or juice are also acceptable.
- The choice of fruit served should be adjusted based on service delivery style.
   For home delivered meals whole fruits may be preferred over fruits such as apple slices.
- Grain substitutions should be Whole Grain Rich products (whole grains, enriched grains, bran, and germ).
- Low sugar cereals should be used.
- Low sodium, low fat meat choices are recommended.
- Salads should be made with dark green lettuce selections such as romaine, kale, spinach, and spring mix.
- Salad dressing should be reduced calorie.
- Substitutions should be similar cooking methods. For example, substituting chicken for beef in a BBQ recipe is an acceptable substitution. Substituting scalloped potatoes for rosemary potatoes is not an acceptable substitution because the scalloped potatoes are much higher in fat, calories, and sodium.
